

# Carbon Reduction Plan

SparkTricity Ltd is committed to reducing its carbon emissions and supporting the UK transition to Net Zero. This plan is prepared with reference to the approach set out in PPN 06/21 and will be updated as we measure and improve our performance.

## Commitment to Net Zero

SparkTricity Ltd is committed to achieving Net Zero greenhouse gas emissions by 2050, with interim reductions delivered through the measures below.

## Baseline & current emissions

We are establishing our greenhouse gas emissions baseline across Scope 1 (e.g. company vehicles and fuel), Scope 2 (purchased electricity) and relevant Scope 3 categories. [Baseline year and reported emissions figures (tCO<sub>2</sub>e) to be inserted once measured.]

## Emissions reduction measures completed or underway

- Transitioning the vehicle fleet towards lower-emission and electric vehicles as it is renewed.
- Reducing fuel use through route planning and minimising unnecessary travel.
- Switching to renewable / lower-carbon electricity where possible and improving efficiency at our premises.
- Reducing, reusing and recycling site and office waste, and minimising packaging.
- Delivering fabric-first retrofit and energy-efficiency works that cut our clients' carbon emissions.

## Future measures & targets

- Set science-aligned interim reduction targets once the baseline is confirmed.
- Continue fleet decarbonisation and explore low-carbon plant and equipment.
- Work with suppliers and subcontractors to reduce supply-chain (Scope 3) emissions.

## Declaration

This Carbon Reduction Plan is published in line with our environmental commitments and approved at Board level. It will be reviewed at least annually.

**Signed (digitally signed):** Manjit S. Tamber, Managing Director, SparkTricity Ltd

Published: December 2025 · Next review: December 2026

*Note: emissions figures to be inserted once the baseline assessment is complete.*
